10.	Main objective/s	The post-graduate study programme that RE-BUILT project is proposing promotes the integration of sustainable rehabilitation of the built environment in civil engineering education as a vital implementation of knowledge transfer from academics to students as well as between different European faculties of Civil Engineering. In this context, 8 partner universities from different countries are involved in the RE-BUILT transnational project, which generates a network of high level competences in the Civil Engineering area. The partner universities have been selected in order to meet at least two of the following three criteria: 1) a long tradition in internationalization activities; 2) a high number of students that will primarily benefit from the project results in their studies; 3) specific competences in the area of sustainable rehabilitation in Civil Engineering.
